03. Initial Operating Guide

1. When pushing and pulling, please ensure that the handrail has shrunk to a minimum and fix the handrail locking and quick dismounting device. Put it on a flat floor, please don't put it on too soft cushion or thick carpet.

2. Loose the handrail locking device, lift the handrail to a vertical angle, and tighten the handrail locking device.

3. Unfold the treadmill, adjust the walking belt to the center position, slowly unfold it and assist in pressing it down to make it completely flat, or rotate the bottom foot cushion for leveling.

4. Adjust the handrail quick mounting device to a suitable height, and then lock the device. Yellow marks on the handrail sides indicate the recommended maximum and minimum heights.

5. Install safety switch, connect power supply and turn on.

7. Open APP, follow the prompts to add and bind the treadmill for use.

6. Download "KS Fit" APP from Apple Store or Google Play Store and complete installation.

04. Learn to Use the Treadmill

1. Mode Description

- 

Standby Mode
The standby mode indicator lights up, the motor and sensor stop responding.
- 

Manual Mode
The manual mode indicator lights up, control the speed via remote control or APP.

05. Safety Instruction

- ⚠ The space distance behind the treadmill should be kept above 2000 mm. In case of emergency, you can hold the handrail tightly with both hands and support your body to jump off the treadmill.

- ⚠ The distance between the two sides of the treadmill should be kept above 500mm.

- ⚠ Do not wear loose or dangling clothing while using the treadmill, you should wear sports shoes and clothes. Please exercise according to your own situation. If you feel uncomfortable during the workout, please stop immediately and consult a doctor. Otherwise, you may be at risk of injury.

- ⚠ Please unplug the power cord when not in use.

- ⊗ Do not step on the head of the treadmill.

- ⊗ Do not bring pets when using.

Actuator release force: 7N
Clamp release force: 18N

- ⚠ Read, understand, and test the emergency stop procedures before use. When using, please clamp the other end of the safe lock on clothes. If there is an unexpected situation, pull off the safety lock to stop the treadmill immediately.

Start to use the treadmill

The treadmill has an emergency stop mechanism for your safety. Before starting your Training, attach the safety key to your clothing. If the treadmill was switched off due to the safety key being pulled out, insert it again. The continuous belt does not start up again automatically.

Uncontrolled use of the treadmill by a third party can be avoided by taking the safety key off and storing it in a secure place.

In an emergency, hold the handrails tightly with both hands and step off of the belt onto the side surfaces of the side platforms. Activate the emergency stop mechanism (safety disconnect).

- ⊗ Do not operate electrically powered treadmills in damp or wet locations. Do not use it on an irregular ground.

- ⊗ Do not use the treadmill upside down or sideways.

- ⚠ Use with caution for the elderly, children and pregnant women.

05. Safety Instruction

⚠ Watch your hands.

⚠ Take care of your belongings.

⊗ Do not fold before power off.

⚠ Keep treadmill upright and put it in the space with supporting points on both sides as far as possible, please stay away from children.

⊗ Do not get on and off the machine under running condition.

06. Maintenance

1. Clean the treadmill

- Disconnect all power before servicing the treadmill.
- Add a little mild detergent to the 100% cotton cloth. Do not spray the detergent directly on the walking belt or use acidic and corrosive detergent.
- Do not wipe under the walking belt
- After a period of exercise, dust and stains may appear on the rear floor. This is normal and just wipe.

2. Walking Belt Slipping and Correction

- Start the treadmill and run at a speed of 3 km/h.
- Walking belt to the left: Turn the left adjusting hole screw clockwise by 1/4 turn.
- Walking belt to the right: Turn the right adjusting hole screw clockwise by 1/4 turn.
- Walking belt slipping: Turn the left and right adjusting screws clockwise for 1/2 turn at the same time.
- After each adjustment, it needs to run for a period of time (1-2 minutes) to observe the correction. Please adjust again if necessary.

3. Walking belt lubrication

- Power off the treadmill and unplug the power cord
- Lift the edge of the walking belt and smear the inner surface with silicone oil.
- Start the treadmill to run at a speed of 3km/h for 10-20 seconds.
- 5-10ml of silicone oil is required for one lubrication. Excessive application may cause slipping and affect normal use.
- Lubricate your walking belt every three months.

07 Implied Warranty

The importer of this machine assures that this device is manufactured with high quality materials.

The prerequisite for the implied warranty is the proper setup in accordance with the operating instructions. Improper use and /or incorrect transportation can void the warranty.

The implied warranty is valid for 1 year, beginning from the date of purchase. For eventual defects please contact the dealer of this product within the guarantee period.

The warranty applies to the following parts (as far as included in the scope of delivery): Frame, cable, electronic devices and wheels.

The guarantee does not cover:

- Damage effected by outer force
- Intervention by unauthorized parties
- Incorrect handling of the product
- Non-compliance of the operating instructions

Wear parts and expendable parts are also not covered.

The device is only intended for home and office use. The warranty does not apply to commercial use of any kind.
